

Cabinet Doors & More

WOOD DOOR SELECTION

All doors available raw unfinished
or in a variety of stains and lacquers
and solid color lacquers

Introducing ***SILHOUETTE DOORS***

Cabinet doors, made with the same excellence that Cabinet Doors and More has become known for with its other quality wood products.

Our mission is to supply wood products that exceed our customer's expectations in quality and service. Doors are produced using selected material, primarily from northern hardwoods, with priority given to uniformity of grain and colour. While natural wood characteristics vary in species, we do not allow unacceptable mineral or colour defects.

Located in Edmonton Alberta, our facility allows us to produce large or small orders. All the species noted can be used for solid panel doors, including beadboard, with most of them available in 1/4" or 3/8" plywood panels. Doors and drawer fronts are pre-sanded, although a light sanding may be needed before staining.

Silhouette Doors are made with the following quality standards:

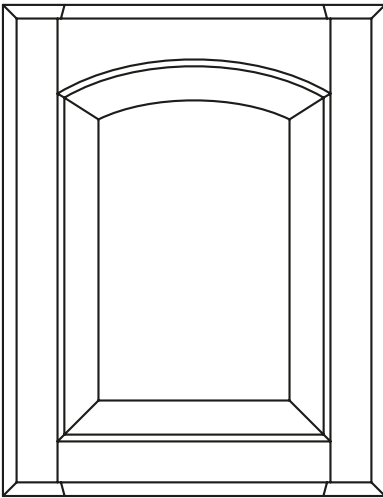

- accuracy of size within 1 mm.
- warpage or bowing will not exceed 1 mm per foot in width or height.
- space balls are used to allow for panel expansion.

Silhouette Doors... the outsource solution for your custom needs! We look forward to supplying the quality products your clientele expect.

		22	EM	220
		00-N/A		00- N/A

Please note: Last digit of the rail profile indicates rail width.
 0 = Standard 2 1/4"
 1 = Specify any other width

Door code example:

2020-S-14-EE-150

Technical Information

Minimum door width; standard is 7-1/4" wide (or rail width + panel relief x 2 + 1/2" = minimum width)
Standard door thickness is 13/16".

Drawer fronts:

Panelled Drawer Front top & bottom rail pieces are 1-5/8" wide. Larger than 7-1/4" fronts have standard rail width. Horizontal grain is standard for panelled drawer fronts (except panel profiles #17 & 18). Any deviance from this will be considered a special order.

Multi-panel doors:

Doors over 42" high will have a straight (not arched) center rail, in the middle unless customer specified a different design.

Many configurations of multi-panel doors can be ordered. Quantity and placement of crosspieces should be noted on the order.

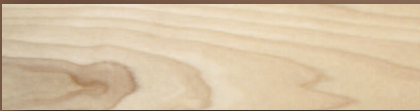

Glass doors with mullion:

The quantity and placement of lites needs to be noted on the order. Any custom designs, including glass and panel combinations, also need to be noted.

Cabinet Doors and More Inc. is not liable for any costs incurred by improper handling, finishing or installation of its wood products. Raw wood must be finished within a reasonable time. Any defective materials must be reported upon receipt.
